General rights

Copyright and moral rights for the publications made accessible in the public portal are retained by the authors and/or other copyright owners and it is a condition of accessing publications that users recognise and abide by the legal requirements associated with these rights.

- Users may download and print one copy of any publication from the public portal for the purpose of private study or research.
- You may not further distribute the material or use it for any profit-making activity or commercial gain
- You may freely distribute the URL identifying the publication in the public portal ?

Take down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

The legal scope of copyright mentions

The world of intellectual property rights is full of signs, symbols or mentions which are generally used next to the work that can be protected. However, the legal scope of these indications is not always obvious for not IP friendly users.

Copyright notice and the “©”symbol

Copyright protection is granted by the sole fact of the creation of a work if it's expressed in a particular form and original.

Copyright notice such as « © NAME 1999 » is not mandatory to enjoy copyright protection. Such a notice should not be considered as a guarantee of existing rights on the work. A copyright mention presumes that the person mentioned is the copyright owner on the work.

The omission of a copyright notice will consequently not deprive the author of all legal protection. One should always check if a work is protected by copyright even if nothing is stated.

However, there are some practical advantages in using a copyright notice.

For example, if you want to use a work, a copyright notice may help you to find the author. Indeed, if a copyright notice is attached to the work, you will first contact the mentioned person. It will be wise to ask him to confirm that he is the true copyright owner.

It can also be very useful in case of dispute since it constitutes an element partially establishing the creation. A copyright mention will presume that you are the copyright owner. The burden of proof is on the person who contests the ownership of the person mentioned by the copyright notice.

The « copyfree » mention or « copyleft » mention

More and more works are available on the web or directly for the public with mentions such as « copyleft » or « copyfree ».

One should pay attention to these indications. If a work is original and the duration of protection is not expired (70 years after author's death), this work remains under the scope of copyright protection.

The mention “copyfree” is used by the author in order to give a free licence to the user under some very specific conditions. The user is authorised to use the work within the limits determined by the author. An author might indeed wish to exclude a commercial use of his work and allow it for only private and personal uses.

In any case, one should check the directions for use attached to the work in order to know which are the uses allowed by the copyright owner.

A limited legal scope

The main point of copyright notices is indicating users the author's identity (copyright mention) or informing users of a free licence given by the author ('copyleft' or 'copyfree' mentions).
