

A spatial microsimulation model to forecast health needs of elderlies in 2030 (work in progress)

In this presentation, Morgane Dumont will discuss her research into forecasting the health needs of elderly people in Belgium.

Morgane is an Associate Fellow at SMART Infrastructure Facility, University of Wollongong. Her areas of expertise include synthetic populations, statistics and mathematics, agent-based modelling and high-performance computing.

3.30pm, Friday, 1 July 2016
Building 6, Room 105
